

## Utilizing Cutting-Edge Telemedicine Equipment

Avel eCare Senior Care provides 24/7 access to a multi-disciplinary team who specializes in caring for aging adults. The clinical team leverages high quality tools to complete a virtual health exam. The assessment tool allows the clinician to check basic vital signs, such as heart rate, blood pressure, and temperature. The peripherals (pictured below) also enable the care team to examine the patient's skin, ears, mouth, and throat. Benefits of Avel eCare Senior Care include:

- Improve access to urgent medical care
- Reduce the need for ER transfers and hospital admissions
- Less staff time consumed with transfer paperwork and transportation
- Geriatric mentorship for the nursing workforce
